

Kenilworth School District 38 defines equity in education as providing each student access to resources, opportunities, and a curriculum that meet their needs and will work towards reducing opportunity gaps. We are dedicated to supporting each student to reach their potential by honoring and building upon the strengths and assets of individual students, by discovering their authentic self.

In an inclusive and equitable environment, **everyone** feels empowered to share their unique experiences and ideas and learn from different perspectives, so all feel welcomed and valued as community members. An equitable and inclusive schoolhouse will contribute to positive student outcomes and a culture in which our values of respect, kindness, responsibility, and honesty thrive.
